

## Deep Learning for Perceptron

### Lab # 3

1. Run the following 2 – Layer Neural Network

<https://github.com/javismiles/Deep-Learning-predicting-breast-cancer-tumor-malignancy/tree/master>

2. Modify the above code for the 3-layer neural network. For only 1 epoch verify your answer which you have calculated in your assignment task 6. Both answers must be comparable.
2. Modify the above code for the assignment task 6. And calculate your answers only through code.
