Q#01: What are my strengths:

My strength is problem solving skills. Because of that I am very good at programming complex pattern in python and C++. I am very keen to pursue it further in career as a developer too.

Q#02: Where do I belong:

I will be best fit in organization providing services to other companies and organization in terms of product development and maintenance.

Q#03: How do I work?

I usually learn stuff and polished my work by video tutorials and documentation.

Q#04: What are my values:

I like to work in pairs and groups with similar skill but having sufficient skill set level so that they can be more efficient like concept used in Xthre programming.

Q#05: What can I contribute

I am very impatient so I usually done work before the given deadline that help me make faster changes if some comes.
