# LAB TASK:

Q1) In caching, what is the difference between the age header and expires?

Q2) What are the four groupings of HTTP headers?

Q.3) Implement the given topology and assign ip address by using your roll number.

Q.4) To solve this task follow the steps of HTTP which is given in the manual.

Take Snapshot of each Step, and Submit in Docx file/pdf with one line answer, what you understand here? Observe the difference between HTTP and HTTPS and answer in one line with proper snapshots
